Assessment of products allowed for use in organic production

The following products are assessed as allowed to be used in organic production certified in accordance with KRAV's rules and Council Regulation (EC) No 834/20072 and Commission Regulation (EC) No 889/2008 according to the documentation examined by Kiwa.

Product

Quaterna®Activa 500 - fertilizer additive

Quaterna®Terra UAB - soil improvement product

The decision is valid for three years, starting with today's date, that is, until **2022-06-14**.

This decision is based on current conditions in KRAV's rules and the EU organic legislation. If the rules are changed the decision may also be changed.

If the product or the manufacturing process is changed, with regard to the type of raw materials / ingredients, process additions and / or the manufacturing process, this shall be notified immediately to Kiwa, who decides whether a reassessment is needed.
